

Air Conditioning Hire

COOL DOWN from €20 per week!

Aska Sykes Air Conditioning Hire offer a wide range of portable air conditioning units for hire or sale.

These are divided into four main categories: **Exhaust tube units** which disperse the heat via a small exhaust tube. **Split type units** which are typically used for environments which require large cooling capacities such as server rooms or large offices. **Evaporative coolers** which provide comfort cooling where conventional air conditioners cannot be used. **Cooling fans** which are often used to provide a more comfortable environment to large areas such as marquees, workshops or shops. Check our website www.askasykes.ie for more details.
